Use of Estimates:
The preparation of financial statements in conformity with Indian GAAP requires management to make estimates and assumptions that affect the balances of assets and liabilities and disclosures relating to contingent liabilities as at the Balance Sheet date and amounts of income and expenses during the year. Examples of such estimates include provision for doubtful debts, income taxes and future obligation under employee retirement benefit plans. Management periodically assesses whether there is an indication that an asset may be impaired and makes provision in the accounts for any impairment losses estimated. Actual results could differ from those estimates. The effects of adjustment arising from revisions made to the estimates are included in the Profit & Loss statement of the year in which revisions are made
